**Compliance Requirements, Controls, and Best Practices for Business Growth**

ITAR compliance does not have to be a barrier to growth. Join us for a practical discussion on navigating the International Traffic in Arms Regulations (ITAR) and understanding the requirements that impact companies working in defense, aerospace, and government contracting.

**Pavit Arora** and **Rachel Small** will provide an overview of the key ITAR requirements that companies need to understand, along with practical guidance on implementing effective controls, managing compliance risk, and supporting growth in regulated industries. Whether you're new to ITAR or looking to strengthen your compliance efforts, this session will provide actionable guidance to help your organization manage risk and pursue new business opportunities with confidence.

Attendees will gain a clearer understanding of how to build and maintain an effective ITAR compliance program, avoid common pitfalls, and align compliance efforts with broader business objectives. You will leave with practical insights to help support growth while meeting regulatory requirements.
